## Switch to CMSSW_11_0_0_pre6 - Part 1

Step3 from the release (trackingOnly):

> cmsrel CMSSW_11_0_0_pre6

> cd CMSSW_11_0_0_pre6/src/ && cmsenv

> runTheMatrix.py -w upgrade -n | grep 2026 | grep trackingOnly | grep 14TeV (need step2.root)

> runTheMatrix.py -w upgrade -l 20434.1 > 20434.1.log &

Reconstruction and validation done with:
cmsRun step3_RAW2DIGI_RECO_VALIDATION_DQM.py (running over step2.root, do we have MC samples?)

### Release generated script with cleaned up cff files & paths

Version 2) Release generated script with new paths plugged in
############
step3_RAW2DIGI_RECO_VALIDATION_DQM.py

needs:
- step2.root
- extras_cmssw_11_0_cff.py (extra modules needed)
- raw2digi_step_cff.py
- MC_Tracking_v0_cmssw_11_0_cff.py / MC_Tracking_v1_cmssw_11_0_cff.py / MC_Tracking_v2_cmssw_11_0_cff.py
- MC_prevalidation_v0_cff.py / MC_prevalidation_v1_cff.py / MC_prevalidation_v2_cff.py
- MC_Dqmoffline_step_v0_cff.py / MC_Dqmoffline_step_v1_cff.py / MC_Dqmoffline_step_v2_cff.py

example

```
process.load('raw2digi_step_cff')
process.load('MC_Tracking_v2_cmssw_11_0_cff')
process.load('MC_prevalidation_v2_cff')
process.load('MC_Dqmoffline_v2_cff')
```

slight changes in the new release, like a parameter called seedAs5DHit is needed for TrajectoryBuilders (all changes can be found with a comment search #cmssw_11_0)

Extra needed modules

```
process.load("extras_cmssw_11_0_cff")
process.load('Configuration.Geometry.GeometryExtended2026D41Reco_cff')
process.load('Configuration.StandardSequences.MagneticField_cff')
#process.load('Configuration.StandardSequences.RawToDigi_cff')
#process.load('Configuration.StandardSequences.Reconstruction_cff')
#process.load('Configuration.StandardSequences.Validation_cff')
#process.load('DQMServices.Core.DQMStoreNonLegacy_cff')
#process.load('DQMOffline.Configuration.DQMOfflineMC_cff')
process.load('Configuration.StandardSequences.FrontierConditions_GlobalTag_cff')
```

commented out

```
process.schedule = cms.Schedule(
*[process.raw2digi_step,process.MC_Tracking_v2,
process.MC_prevalidation_v2,process.MC_validation_v2,
process.MC_Dqmoffline_v2, process.DQMoutput_step])
```

## Switch to CMSSW_10_6_0_patch2 - Part 1

### Step3 from the release (trackingOnly):

> cmsrel CMSSW_10_6_0_patch2

> cd CMSSW_10_6_0_patch2/src/ && cmsenv

> cmsDriver.py step3 --conditions auto:phase2_realistic -n 10 --era Phase2C8_timing --eventcontent DQM --runUnscheduled -s RAW2DIGI,RECO,VALIDATION:@trackingValidation,DQM:@trackingOnlyDQM --datatier DQMIO --geometry Extended2023D41 --filein file:step2.root --fileout file:step3_inDQM.root --mc --no_exec (to get only the step3 file and not the rest, we have MC_samples)

### Reconstruction and validation done with:

cmsRun step3_RAW2DIGI_RECO_VALIDATION_DQM_MC.py
